

The Netpreneur News Hidden Freebies Guide

(C) 2006 Stuart Reid, www.NetpreneurNow.com

*** Discover exactly HOW to get **thousands of dollars** of scripts, ebooks, tools and applications at no cost - including resell rights and websites! ***

Hi!

So what is this all about?

Simple. I'm going to give the URL's to *tons* of great products that will **NOT cost you a single cent**. This is totally legitimate, but many marketers are not aware these resources exist.

I'll also take a moment to show you exactly how to get these products, and how to manage your downloads correctly. Plus - how to monetize these `free` packages!

This file will be updated as and when it's necessary. Feel free to give this away to your own visitors and subscribers - you have been granted full Giveaway / Master Resell Rights!

All I ask is the links and copyright message at the top remain unchanged.

For HTML, TEXT and PDF Versions or to register your e-mail on the update list please visit this URL:

Welcome to the secret source to literally hundreds of downloads worth thousands of dollars! Throughout the sites listed below you can instantly download all the marketing tools and ebooks you could ever need - most with resell rights.

What do you do with these downloads? It's tempting to just start downloading like crazy - then you'll find yourself with a harddrive full of files that you never use. This is the wrong way to go about it. Have a target in mind before you download. Most of these sites are here to stay, so there's no need to waste bandwidth and download just for the sake of it.

You can download files for own use, download to resell, create your own bundles/sites, look for bonuses to include with your own offers, and much more. Surprisingly many of the books and tools you'll find as bonuses or in membership sites will be actually *sold* in other places!. Not everyone is aware of these resources, don't feel guilty about selling something you had for free.

I've often sold packages that I've sourced for free. It's why Marketers like myself are often not willing to reveal these "secret" sources, since it will undoubtedly mean less sales for themselves. I won't do this often - consider this guide a lapse of judgement on my part :-)

Marketers offer free gifts and membership sites in an effort to build their mailing lists and to earn some money on `back end` offers. Respect the work these people have put in to their sites and collections. Just because something is free does not mean it's sub-standard.

Please keep one thing in mind: Although some of these sites may show you a "one time offer" when you first join or visit you DO NOT have to purchase this to get to the freebies! Clicking "No" (or it's equivalent) will usually do the trick.

But don't disregard these one-time offers out of hand. Take a moment to read them, you'll be pleasantly surprised at what's on offer.

The following sections carry 6 tips each on downloading, profiting with, and marketing with freebies. [To jump direct to the downloads please click here...](#)

Please Note links to temporary Giveaways and time-limited offers are in the Free Rights blog. It's worth visiting at <http://freerights.blogspot.com>

Quick Tips To Effective Downloading

1. Create a folder on your Hard-Drive to hold the software you download. Save everything to there.
2. Use a secondary e-mail account for the `Giveaway` sites as you may end up as a subscriber to a ton of lists. Use [Fastmail](#), [Yahoo! Mail](#), [HotMail](#) or [Gmail](#). You may also be able to create a new account with your ISP, or with your Host if you have your own site.
3. Sign up when you need to with the Secondary address. You may have to confirm the address for some sites so check back often. If you find a e-zine or marketer you like consider re- joining with a main e-mail address.
4. Downloads are usually either provided straight after sign- up (don't close the window!) or via e-mail. Sometimes, it's the SECOND e-mail after confirmation that holds the download. If you see what looks like a sales-pitch after the sign-up check the end for a "Continue" link, since many marketers now use "One Time Offers". You have not been scammed - the free download is still there, you just have to click through the offer.
5. Especially if you use a free Web-based account make sure the confirmation or download e-mails

have not ended up in the `Junk`, `Bulk` or `Spam` folder.

99% of Marketers providing free software are legitimate. If they have something to give, they will give it!

6. Just because something is older doesn't mean it's worthless. Always look for quality rather than hype. You'll soon know whose products to look for, and which contain real information.

Profiting From The Downloads

1. Sometimes you can sell a quality software package on it's own even if you downloaded it for free. If it has resell- rights, you are legally allowed to do so. Usually they have ready-made websites you can use thrown in. Just a matter of changing the "order" button.

2. Consider creating your own bundle from various packages, perhaps themed together. For example, a bundle about Site Promotion containing tools, scripts and guides on that subject.

3. Use some of the freebies as Bonuses to something you already sell. This may spur buyers `sitting on the fence` to act.

4. Consider placing the software packages on eBay if allowed, but be warned eBay prices for e-books etc have bottomed out. Even though you are unlikely to make a big profit you can still get a customer, and the prospect of future sales.

5. Think about Giving Away some quality software in order to build an e-mail list. You can also use a One Time Offer yourself before the visitor downloads the tool. That way you can get a subscriber, and get a few sales as well.

6. If a package has Private Label Rights or it is Brandable you can even embed links and offers within the package itself. If the package is `zipped` you can add a small html-file with information about your site or services into the archive. You can also use a utility such as `AnyBrander` to incorporate this information.

Marketing With Your Own Freebie

"Freebies" are provided by Marketers so they can (a) grow their lists, and (b) earn money. By providing your own freebie you too can do this!

1. The easiest and most effective way to use this method of marketing is to join a Giveaway Site or JV yourself. This will let you benefit from the traffic these huge events generate.
2. Make sure your freebie is NOT provided immediately, but only after the e-mail address is delete. It's only fair to let the subscriber have an easy way to leave, even if it means they join, download, then quit.
3. Immediately after the signup go to a `one time offer` page before the download. Make your offer as attractive as you can. It makes sense to offer a discount (\$27-\$97 are common prices) and to offer something related to the main product.
4. If you can, make sure your product itself includes links back to your own site(s). Also include other income-streams such as affiliate programs.
5. Including Giveaway Rights may mean it will spread further, with a viral effect. Including resale rights may even encourage to spread quicker since other marketers can make money on the product. If you can include Branding that gives another incentive for it to be offered. Branding normally includes the marketers name, link, and perhaps an affiliate option. Try PayDotCom.Com or ClickBank.Com for low-cost affiliate solutions.
6. Regularly follow up to the subscribers you have gained with quality information, more freebies, and offers/promotions. Keep in mind the fact that it's unlikely all your e-mails will be read (due to `blackhole` e-mail accounts and bounces) but you should still get a worthwhile response rate.
